Summary

Full-Stack Developer (MERN) with experience building modern web applications, from e-commerce platforms to real-time AI chat apps. Skilled in React, Node.js, and integrating tools like WebRTC and Socket.io. Backed by recent blockchain research experience from NIT Jamshedpur, I enjoy creating secure, user-friendly, and high-quality software.

Education

B.Tech in Computer Science & engineering
GGU (Central University), Bilaspur, India

Oct 2023 – May 2027
CGPA: 7.8/10

Experience

National Institute of Technology (NIT) Jamshedpur, India

June 2026 – July 2026

- Completed a summer internship at the Department of Computer Science and Engineering under the guidance of Dr. Dinesh Kumar, Assistant Professor.
- Collaborated as a team member on the project titled “Blockchain-based Access Control for Healthcare Applications”.
- Engineered decentralized access control mechanisms using smart contracts to ensure secure, tamper-proof, and transparent sharing of sensitive electronic health records (EHR).

Projects

Glam-Beauty: Full-Stack Enterprise E-Commerce Platform

[GitHub](#) | [GoLive](#)

- Engineered a dual-portal architecture featuring a customer storefront and a super admin management panel using React, Vite, and Tailwind CSS.
- Implemented role-based access control (RBAC) with JWT, integrated the Razorpay SDK for secure checkouts, and built live business analytics dashboards using MongoDB aggregation pipelines and Recharts.
- Tools: *React (v18/19), Vite, Tailwind CSS, Node.js, Express 5, MongoDB Atlas, JWT, Cloudinary, Razorpay, Recharts, Vercel*

Talk-Sphere: AI Chat & Social Communication Platform

[GitHub](#) | [GoLive](#)

- Developed a real-time communication platform utilizing Socket.io for instant text messaging and WebRTC for peer-to-peer (P2P) high-definition voice and video calling.
- Engineered secure profile management and rich media sharing via Cloudinary, and implemented WaveSurfer.js for dynamic canvas-based waveform rendering of audio notes.
- Integrated the Google Gemini API to build an embedded AI conversational assistant featuring streaming markdown generation and multi-session context retention.
- Tools: *React 19, Vite 8, Node.js, Express 5, MongoDB, Socket.io, WebRTC (simple-peer), Google Gemini API, Tailwind CSS, WaveSurfer.js, Cloudinary*

Skills

Languages: JavaScript, C, Java, SQL

Frameworks & Libraries: React (v18/19), Next.js, Tailwind CSS, Vite, Socket.io, WebRTC, Recharts, WaveSurfer.js

Backend & Databases: Node.js, Express 5, MongoDB, REST API

Devops, Tools & APIs: Git/GitHub, Firebase, Vercel, MongoDB Atlas, Cloudinary, Postman
